DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 20 February 2021 at 02:34 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to remain Low across all parts of the UK, in the prevailing unsettled and windy weather conditions.

Tomorrow: Air pollution levels are expected to remain Low across the UK, with little overall contribution expected from possible Saharan dust that may pass near the southeast of the UK. Outlook: Easing winds may allow a build-up of locally-generated pollution in the east of England initially, perhaps to locally Moderate levels, but soon reverting to generally Low levels as seen across the UK.
